

LeagueLoch's Purpose And Usage

LeagueLoch, was only written, for the purpose for managing your own Legal paper work. Having, a large volume of paper work, would be mind blowing, and would benefit you by being organised.

Legal companies, do not use LeagueLoch, but instead, have a properly built Legal management system, which manages all of their paper work, and all of the Court proceedings.

LeagueLoch, is a poor man's Legal paper work filing system, which helps you to link the documents together.

When, you are adding your Legal documents to LeagueLoch, you can then add all of the in link document links, in the records summary, for the future creation of a html linking file.

This html file, will be used to link all of the documents together.

Please note, that your in document links syntax, should look as follows:-

file:///R:/your_pdf_file.pdf#page=??

You're looking for any inconsistencies/contradictions within the documents !!!!

Simple....
